FOR THE PRESIDENTIAL CAMPAIGN.

REAL COUCHIN'S RESULTS OF EMANCIPATION.

Proving what are the practical workings of

PRESIDENT LINCOLN'S POLICY.

The most important and timely book of the season, which

should be CIRCULATED EVERYWHERE.

THE STANDARD WORK ON EMANCIPATION.

MANY THOUSANDS have already been sold and the demand is constantly increasing.

Read the following letter from the first statesman of the country, testifying to its importance.

From Senator Webb.

Mr. Webb examined Mr. Lincoln's Results of Emancipation, and especially the part relating to the Freedmen and their work on that subject, and has come under my notice, and conclusively shows that, wherever the experiment of emancipation has been tried, it has always been found beneficial, not less to the colored people than to the white. The success of the experiment of the war would have powerfully to correct public opinion on that subject, and the friends of freedom throughout the nation could do nothing more effectual to promote the cause of Emancipation by the use of this circular.

From Senator Davis.

It is the first work which by contrasting the partial statements which contradictory conclusions have been extorted by adverse parties, has given a new proof that Emancipation is no exception to that rule that freedom is the best condition of man and of society.

Its most remarkable part is the ascription of Emancipation to Christianity, in an era when his power is supposed to be on the wane.

Its most interesting part is His judgment by events of the progress of civilization, vanity and social snobbish with which the overwhelming interest has shamed the voice of reason and religion.

The most remarkable parts to us, at this time, is the striking demonstration of the necessity of indemnity in the general interest of industry, to enable the owners of land to pay wages to the freed negroes so to compensate the owner for the loss of property, but to relieve the society from the entire prostration of agriculture.

This is the only country on its true ground of industrial needs, and gives its true measure. The negro must either work or beg. The master must have wages to pay, or leave his land a wilderness. If the master can pay wages, he has much labor as before, and the freed negro the means of gaining a living elsewhere.

The conditions of the emancipation of about as many slaves as those in the loyal States, discussed by Cochran, very naturally from those under which a similar experiment had been before tried. But the most palpable evidence of the criticism of the facts are universally applicable; and the law of indemnity has for the first time, as stated as to entitle it to universal acceptance.

The work of Mr. Cochran is plain, excellent, and practical, especially at this moment. It is of infinite value as a witness with regard to the past and as a guide to the great duty which is now before us. Wherever it is read Emancipation will be accepted as a good and wise political measure, sure to bring good fruits to overwork and hard labor. Charged with such a mind, the book should travel far and wide.
